PROJECTS

Crypto Currency Platform | HTML, CSS, JAVASCRIPT, MONGODB

- Developed a cryptocurrency trading platform using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB. The platform enables users to track cryptocurrency prices, manage virtual portfolios, and execute basic trades. Implemented Express.js and Node.js for backend API development, ensuring efficient data handling and secure transactions. Integrated MongoDB for user authentication and portfolio storage, with a responsive UI for an enhanced user experience.

StyloCode – Transform UI/UX Design into Code: Developed a web-based tool that allows users to visually design web pages using a drag-and-drop interface and automatically generates the corresponding HTML, CSS, and animations. Simplified front-end development by converting visual elements into clean, production-ready code. Implemented dynamic layout recognition, responsive design features, and modern CSS animations, enabling rapid prototyping and design-to-code conversion.
